## About me

I believe, exploring diverse fields of knowledge help in acquiring a deeper understanding of each field which is why I always desire to broaden my horizons.

My DIY-enthusiast Dad has always influenced me to create and present things in the most impressive manner possible.

By combining abilities of design and code, I wish to create immersive experiences be it teaching at school or storytelling. Besides an aspiring designer, I'm an audiophile who loves to play guitar and wants to travel the world to capture the most beautiful compositions of nature.

## Personal Details

**Born on** 27<sup>th</sup> February, 1996

**in the city of** Moradabad, Uttar Pradesh, India
